DNF at 45%. Bland and cliched.

First, I want to address the critics of this book that may say it's too cliche, I disagree. I really enjoyed this book. Megan Fletcher is a young woman in the midst of a zombie apocalypse in all of places Las Vegas. This is not just another dystopian tale, it's also a love story when Megan meets Sam Woods who's also trying to survive, hence the title and action packed adventure. This is the first book I've read by Renee Charles, but I look forward to reading more books by her. Check it out for an entertaining read.

Natalie says

A little less action packed and a lot more love lorn than I liked but an OK read.

It's pretty good.

As someone else said, it's more Romance with zombies than a zompoc, but I did appreciate that everyone she met wasn't worse than the monsters. I like my zompoc protags to be more than human, honestly, but simple immunity was a disappointment. I found both the protags believable, unlike another reviewer, here, and wasn't put off by her squeamish ness toward guns or her penchant for arguing with him. I could see me acting the same way, actually.

So short

This story was good and had a twist here and there, some more predictable than others. A quick read for me, but it was great nonetheless. It moved fairly quick, and kept me wanting to keep reading which is great! I will most likely pick up the next one.
