Donna Davis says

Oh my stars. My copy, acquired in the late 1970's, has a price tag of \$4.95. While less incredibly valuable than her crock pot cookery book, Hoffman has created a useful and delicious little tool.

In order to use the candy recipes, you will need a candy thermometer. The butter nut crunch toffee is great, for those of us who can eat walnuts; I make it, and the acorn cookies, at Christmas time.

I confess I have never attempted the custards, tortes, or meringues, and my cakes and frostings come from my mother's secret files, but Hoffman's are probably pretty good. The rest of her work certainly is.

Published in '78. I love reading old cookbooks to see how cooking has changed or stayed the same. There were definitely some goodies in here, but some not so good ones too. A lot of alcohol and liqueur required for a good portion of the recipes.
