I loved all the great new books and authors I found because of this!

### **Allison says**

I thought this was a great idea. It exposed me to authors I may never have found and I am excited to read the full length version of some of the books. It also let me know a few that may not be of interest to me, so I can save my money.

This book is a collection of book excerpts from 14 authors. I had downloaded this book because the content intrigued me and it was FREE! So, definitely worth the d/l.

I like this idea of being able to sample the different authors, their writing style and plot themes. It has certainly broaden my reading list. I will definitely be purchasing a few books from this compilation. Thanx for making this eBook available to those of us whom read avidly and but not sure what to read between Novels, series, etc.

I definitely recommend checking this book out. It will introduce to you to some excellent Indie writers, whom we may otherwise miss. Happy Reading! ;o)

I love getting samples because I can read a little of the book to see if I want to read the whole thing. There are some great sounding ones!

Amazingly cool concept!

So the concept of this book is genius, samples of 10 YA books packed into one for free??? You can choose what you like and purchase it or skip through what you don't like.

I purchased this because it had Chelsea Fine's Avow in it which is one of my favorite books so I figured there has to be some other good ones in here too, right?

It was kind of like finding a diamond in the rough, I decided 2 books I would want to read from it, one I would never look at due to it's morbid cover - Ember - which turned out to be a can't put down best .99 cent book I've ever read!

And Significance which I've seen but never looked at. I am assuming I will read it soon. Nothing else interested me but 3 out of 10 isn't too bad!

Great intro to some wonderful books!

I love these sampler books. They give me a good chance to decide if I am interested in a book or not. Some even have up to nine chapters, which gives a really good idea, since by then you are either bored or hooked.
