Jenee Rager says

I'm so frustrated with the editing of this book. I can normally move past a single spelling error here and there, but this book has multiple errors on every page, some of which completely change the meaning of the sentence and story. It honestly dropped what would have been a five star rating down to a three.

The story itself is fabulous. The author came up with a new plot line, unlike any I have seen before, and kept the pace roaring throughout the story. Special Agent Harrison has been on the force for so long he's basically a legend in the FBI. The Goddaughter he raised after his partners death, has just graduated Quantico and joins him on the hunt for a serial killer. After thinking they've solved the case the killer ups the stakes and demands another agent join their team to solve the case, and the three of them become the "Chosen Three" the book is titled for. It's hard to be more descriptive without giving major plot points away which is a big no-no, especially when the author did such a great job coming up with an innovative plot.

Despite the editing issues I was able to finish (and enjoy) this book because the story was so engrossing. Thank you to goodreads giveaways for an entertaining read.

Special Agent Lee Harrison has been FBI profiling and catching Serial Killers for many, many years. But this book has a twist. Sometimes when you many FBI, Serial Killer books, like I do, you think they all start off about the same. This book was different for me. I enjoyed it very much. I did not want it to end. You have to check out this book. I must read!!! * I received this book from the author and this is my honest review*

A Well-Written, Hard Boiled Crime Novel and Page Turner!

I really enjoyed reading R.H. Lane's crime drama, The Chosen Three. One thing that the author does really well is that you get to "see and hear" what's going on from inside the serial killer's mind, as well as the minds of the FBI agents tasked with stopping him from killing again. The bad guys in this novel are just that, vile, evil and without any shred of redemption, and the victims come from every walk of life. We feel their hopes and dreams, as well as the killer's thoughts as he stalks them, making the reader long for the killer's capture as much as the agents and victims want him to be stopped. Lane has done a good job of creating a haunting, adrenaline producing crime thriller, and creating characters that I hope to meet again in future novels by Lane.
