We Are Their Heaven: Why the Dead Never Leave Us Allison DuBois

What happens to our loved ones when they die?

Is there a heaven?

Is there a true connection and communication between the living and the dead?

Allison DuBois invites us into her world where she delivers messages from our lost loved ones. She convinces us that those who have passed away are constantly with us, providing comfort, love, and support. They are as eager to reach us as we are to stay connected with them.

But the dead have a language of their own. They communicate through signs, dreams, songs, coincidences, and messages delivered in unexpected ways. Allison takes us on an odyssey of these signs -- how to recognise them, how to read them, and how to interpret them. In these pages, you will meet people who have had both heartbreaking and heartwarming communication with the other side, providing comforting proof that our deceased loved ones stay with us and continue to share in the joys of our lives.

Elizabeth Noah Astle says

an interesting read for those that have an open mind. I enjoyed it.

Mauoijenn ~ *Mouthy Jenn* ~ says

This book was very interesting. I do believe people out there in this world have a special gift. As a fan of the show Medium I gobbled this book up. Loved how she covered the part about suicides and how people who commit suicide do not go to hell, they are accepted in heaven for they were not in their right minds when they chose that certain act upon themselves. I really liked reading that. Fast read.

Tamra says

I'm still in the middle of the book, which means I'm reading it really, really slowly. It's a very fast read.

I take some days off from reading it, even though I LOVE it. One reason for that: I cry like a baby when I read it! I already knew there's an afterlife and that the dead can communicate to us. So as I'm reading it and getting people's stories about how their loved ones passed away and how they're still communicating with them now, I bawl! I think what Allison has put together is a GREAT thing: it's part medium coolness, but mostly a tool for healing from grief over the passing of a loved one.

This isn't superb literature, but it really is a good book.

update: I decided to just finish it last night so I didn't have to cry any more. ... This book makes you grateful to have time with your loved ones while you're alive! :) Her message is simple and powerful: Live well and you'll die well. Don't leave things unsaid. Say you're sorry in this life. Don't leave behind regrets.

Anna says

I really enjoyed reading people's stories and experiences. The parts about hospice and suicide were very interesting and comforting. I found that Allison repeats herself by talking about things she's talked about in her other books and it seems she talks about her husband a little too much.

Maureen Sharon says

I purchased this book randomly and it sat on my nightstand for months. My father passed away rather suddenly and there it sat waiting for me to pick it up. This book provided me with comfort that little else

could provide. It put forth scientific proof of Allison DuBois's gift and confirmed many things I had hoped about life after death. I feel she presents her case well and avoids sensationalizing her gift, but instead attempts to ease the minds of grieving survivors and ignites some hope. I would definitely recommend this to anyone grieving the loss of a loved one.

Teresa Jackson says

Sometimes I'm inspired by the story in a fictional book and by one or more of the book's characters, or by the story of a "real" person and how that person met certain challenges in life. Sometimes I'm inspired by the beauty of language, as in a poem, or by certain skills of the author or an author's writing style. And, sometimes I'm inspired by a philosophical viewpoint in a book and by the author's ability to express it in words. But, ***We Are Their Heaven*** personally and spiritually inspired me for a different reason.

While reading this book, I felt like Allison DuBois was talking directly to me about my own heartache of losing a child. She answers many of the questions that plague those left behind when a loved one dies. Reading it assured me that my *hopes* to stay connected with my son were not futile.

This book isn't so much about Allison's ability to channel those who have passed as much as it is about the ability of those who have passed to find her to help them connect with their loved ones. I'm so grateful for Allison's ability to *listen* and channel, and for her skills to write this wonderful book. Thank you.

Susan says

Read this not for the quality of writing - but for the insights Allison brings to the table. Her advice: conduct your life as if your dearly departed are watching, because they are. They delight when you remember them and want the best for you. Hard to swallow the simplicity of her explanation that the dead communicate with us by playing their favorite song or making the lights turn on and off and also do not connect with the notion that numerology has a significant impact on our lives. However, the television show *The Medium* and Allison's experiences helping the living by conversing with the dead is so believable and natural and it is comforting. I would like to believe Grandma Peg, her mother and all my Irish ancestors guide me even after death. After all, I would want to help those I leave behind.

Lee Godfrey says

Started enjoying the book then sadly came across an article where it was stated that her assistance in cases was not quite truth. Checked out her Facebook page and discovered she is currently publicly having a fall out with eldest daughter. I finished the book but the enjoyment was gone. I want to believe but now unsure.

Kareena says

Surprisingly very interesting to listen to (Book on tape) and overall very touching.

I enjoyed it and will most likely try to listen to her other stuff as well.

Apparently the tv show "Medium" is based on the life of Allison DuBois who is a real life medium who can speak to deceased souls , have premonitions, have visions of what happened and all the psychic stuff. She really helps the police in murder investigations but the show is based on her life, but of course the show is a tv show and they dramatize and create plots that are not real or that have never happened. Anyway this book is about her experiences and the experiences of the people she "reads". She also talks about her ability and the show "Medium".

Honestly i'm a skeptical believer. I know there are a lot of fakes out there trying to hustle people and overall great con artists who dupe a lot of people. But I also believe there are real people out there with abilities that don't seem to make sense and that can predict, see, feel or experience things that are real but that none of us can see or comprehend. So I was curious as to which one Allison was. Was she a great fake, or was she for real?

Anyway she's married to a rocket scientist (aerospace engineer) who is not psychic and overall a very methodical scientific thinker, and even he has come to believe that she really does have these "gifts" that can't be explained. The first time I heard her voice on the book on cd, I laughed because she has a nasally voice and sounds like a female version of Ben Stein (to me anyway). So I didn't see her as being those overly charismatic and charming people with a buttery voice that could sell you a car or make you vote for them in upcoming elections. But the other voices on the cd are more pleasant to listen to and although it is her book/cd, her clients tell their own stories through their own words and they seem very sincere. Overall her experiences seem very legit and it's really interesting to hear her view on things.

Overall i've enjoyed listening to the book. I've cried a few times listening to how people have lost loved ones and how Allison has helped them reconnect with them or help them grieve and move on. It's also cool to hear her view on life after death. She says that the spirits of the ones we loved often visit us because "We are their Heaven", and that in a way they're always with us. She says a lot about the afterlife that I won't mention here, but overall I think that it's all very comforting to hear, but also just feels right and seems on-point or true. So anyway I think that her interpretations and her discussions on life after death and spirits and such are really interesting.

Plus i'm one of those people that believes in signs, and in spirits, and in mumbo jumbo, so to speak. I think there's more out there than what we can comprehend or understand, and I think the "Stir of Echoes" movie said it best when, to paraphrase and I can't find or remember exactly what was said, but basically, "It's like we're all in the dark, and every now and then someone has a flashlight and turns it on for a few seconds and can see glimpses in the dark. Some people just have a better flashlight". So ya, I think there are some bizarre things out there that can't be explained but are worth exploring.

Anyway it's pretty cool that a real life medium helps out the police in murder and/or crime investigations, but is also the inspiration for a tv show. I like watching ghost whisperer and may try "Medium" on for size now.

Genesa Richards-Wiech says

I'm a military widow, but I lost my husband to suicide, 2 weeks after returning home from Iraq. This book didn't cover military deaths BUT it did cover suicide and accidents. My best friend lost her husband to drowning, 2 days after returning home from Iraq. So long story short, this book brought ALOT of closure to our lives. It's an amazing read!

Erin says

I get much more out of a book like this than I ever would in a church. It's normal to question what our true purpose in life really is. Why are we here? Who are we REALLY, when stripped of our occupational and other earthly identities? This book doesn't even attempt to answer this, but it brings a comfort that our individual purposes are not random and that we transition to a different dimension when we "die".

I also appreciate the author's attempt to corroborate her gift by including examples of the tests she was put through to prove her abilities - including asking random people if they could identify with the information she was presenting in effort to prove that she wasn't coming up with stories that could be applicable to anyone with a deceased love one (which was proven - her visions/information were too specific).

Carrie says

I have wanted to read this book for years, and was so disappointed. It is a collection of garbled memoir rap thrown in a wordy bowl of meaningless terms. I honestly can't even read it, it is such poor writing and organization. It might as well be Dutch! What a waste of \$9!!!!

Laura says

I wanted to give this book 5 stars because the main message of the story is so beautiful (and true) that it warrants praise. But, the editors of this book sadly did a horrible job, and thus I felt that many concepts within were not clear due to poor editing. Mrs. DuBois is a medium after all, not a writer.

With regards to the many concepts and ideas brought forth in this book, I loved savoring every page. As a person who has lost someone immediately close to me, I found this book to be soothing, healing and enriching. I also found hope and validation while reading this book.

Numerous people hear, feel, sense and/or see their deceased loved ones. It's a common experience, and for good reason according to Mrs. DuBois: there IS an afterlife. In feeling validated of the many instances when I've heard and felt my mother present with me, I gained hope that our relationship didn't end when she died. In fact, my mother and my relationship not only continues after her death, but it thrives.

This book validates my experiences in explaining that my mother's spirit lingers with me not because of anything negative, but rather because I am her heaven. This book explains that we, the living, are the heaven for all of our deceased loved ones. The deceased continue to love us from beyond, and thus their energies linger to ensure that the relationships continue. I think this message is simply beautiful. And, I've recommended this book because of its focus on love, optimism and hope.

Barbara Jones says

Grateful for understanding the feelings of those who have died.

There are so many insights I have experienced with this book. Oprah calls them "a ha moments. " My precious daughter died in an accident & she & I shared a belief in mediums. Without the detailed readings I have received, I would have continued in the depths of depression. Reading how Allison reasons helps me to understand how my daughter communicates with me.

Sara Galindo says

I bawled like a babe and felt inspired throughout reading this book. Allison makes you feel like we are never truly alone and our loved ones and ancestors in the spirit world are always guiding us along in the physical world. It made me realize that we must cherish every waking moment we have and understand it is truly a gift. I will forever look at the small details in life as the moments that truly matter. Easy read and well worth the time. I highly recommend.

There were times where she seemed to ramble but still a beautiful read.

Sonia Suzana says

Great Read

Alanna says

I got this book for a cousin who recently lost her husband to colon cancer, and ended up reading it before giving it to her. It is a great book and gave me added perspective as to what is happening "on the other side". One of my favorite parts is "living well is partially about perspective, and then action. If you have a moment of inspiration about how you might improve the quality of another person's life and don't act on it, then you've really done nothing with that inspiring idea. So know you're being guided, and take that next step. Not only will you be helping another, but by helping that person, you will find the true definition of who you are, one that was written long ago but is being looked at for the first time."

Amy says

A comforting look at life after death from one who knows both sides intimately. If you have lost someone close to you, and you have an open mind, this book can help you see how your loved one continues to be present with you, by giving you common signs to look for and feelings to acknowledge.

Is it all real? At this point, I don't care. After losing my dad, seeing these signs, feeling his presence brings me comfort and healing. The promise of eventually being rejoined with people I've lost makes life easier to bear.

If at the end it was all a farce, somehow I don't think I'll mind...

But, what if it's not? What if when we die, we get to visit our children and grandchildren and bring them comfort during life's trials. What if we don't leave until we're ready. What if there's more to our existence than our incarnate form? What if...

Jennifer says

This is a great book about Allison DuBois, the woman who is played by Patricia Arquette on the tv show "Medium." She is a real life person who has an incredible ability to bring messages from other realms to people who have suffered a loss. She knows information only the parent or family would know and there is account after account detailing this how she went through rigorous testing with various universities arranging to have her do readings on a person and her accuracy was astounding everytime. I found this book amazing and fascinating! It talks about how those who have crossed over can reach you via electricity/energy. That must be how my grandpa who has been gone for 15+ years showed up in a photo we took of my parents! I'm definitely a believer.

Thebruce1314 says

I was hoping for more stories of readings than self-help advice. While some of the stories that were shared were certainly comforting, the dual-perspective format felt a little stilted, and the commentary was sometimes off-putting. I also found the typeset really uncomfortable to read. ?
