Cyberweird Stories: A Contagious Collection of Short Stories and Poems D.C. Lozar

From robots with contagious diseases to space explorers who stumble upon the birthplace of the Cthulhu, these stories twist horror and science into sexy pulp fiction that's hard to escape. Showcasing fantastic stories in which printed people colonize planets, augmented reality is used to punish criminals and take over corporations, and futures where cyberpunk adolescence rule cities where all the adults have disappeared; this is a collection of unique peepholes into the future of our planet and species.

Laura Larson says

I am IMPRESSED. Definitely want to see more from this guy. Wonderfully written (except the 2nd to last, and I'm still not sure wtf I just read) and very entertaining. Very talented at conveying a lot of feeling in a few words. I didn't want to put this book down. If he writes full length novels as well, we might have the next Koontz or King.

Montzalee Wittmann says

Cyberweird Stories

A Contagious Collection of Short Stories and Poems

By: D.C. Lozar

Narrated by: Alexander Doddy

This an audible book I requested and the review is voluntary.

I really loved this book! It was so creative and unique! The stories varied in length and type from silly Billy Goat Gruff trial to a story about a robot with a contagious robot disease and a futuristic nursing home tale to poetry. All of these were wonderful and I would give each of the stories a 5 star rating.

I have never read this author's work before and I am now a fan. This book was so great!

The narrator was awesome! He had to do so many different voices and sounds and he performed it so well!

One of the best narrators I have listened to! Wonderful!

Lynda says

This was my first Cyber type book, I was lucky enough to win a copy. Since I'm not good at writing reviews I feel I had to add something from reading this great book. I loved the stories and poems so much it left me wanting more! Loved the humor , there is something for everyone, Hope to see more like this one in the future!

Genre - Cyberpunk/Science Fiction/Fantasy

Pages - 256

I finished reading "Cyberweird Stories: A Contagious Collection of Short Stories and Poems" by D.C. Lozar yesterday, but needed a day to travel back to reality before I sat down and wrote a review. I want to first say thank you to D.C. Lozar for gifting me an e-copy of this book. Thank you Dave, it was quite an experience. This is a collection of 23 short stories and a few poems. While the cyberpunk theme is pretty apparent in most of the stories, there are many layers to some of the other stories, where no emotion is safe or left untouched. D.C. touches on every emotion and beyond, especially in the poems in this book. Some of the

stories were on the edge of Lovecraftian. Surrealism played a big part in many of the stories...so much so that I had to take a break after reading one story before starting another. The perspective and imagery in the stories were unique and multi-layered. I think the thing I like the most about this read is that it did not follow the rules of the genre, at least that's my take on it. We would go from the most surreal story to a poem about 9/11 with such emotion and introspection. I also noticed that, and I'm not sure if it was intentional, that the color green played a big part in many of the stories. From taste, touch and smell there were greens, emeralds, jades and mints in eye color, landscapes and aromas. There is much to take from this read if you just allow yourself to let go, and be there for the mind blast journey that D.C will take you on. I look forward to reading more of D.C. Lozar and highly recommend this read to anyone who wants an intelligent, mindful and well throughout piece of wordsmithing. It's fun to imagine where D.C. live in his imagination, it must be so much fun there!

Synopsis (from back cover): A collection of weird short stories that vivisect the concepts of transhumanism, steampunk, and cyberpunk in worlds that have evolved from our quest for immortality and innovation. From robots with contagious diseases to space explorers who stumble upon the birthplace of the Cthulhu, these stories twist preconceptions around the twin spindles of horror and science fiction to weave plots that will make you feel like you've just picked up a pulp fiction magazine from the 1920's published in the 21st century.

Alexander says

Cyberwierd Stories has been one of the most entertaining collections I have read. A dystopia is crafted with enough detail to pull you into the world, but doesn't get bogged down by explaining too much (a balance many dystopian stories miss), this allows you to invest in the character's and their individual tales. Full of twists, turns and questions about our own future, Cyberweird is must read for any dystopian fan!

Krystle says

Funny books filled with something for just about every type of syfy lover.

Barbara Senteney says

Absolutely loved this book, it's so cute. I know that sounds strange being it's called Cyberweird. but you would have to read it to understand. I think The Trial Of Three Billy Goats Gruff is my favorite of the tales inside. example , Case number 317 Mr. James A Troll versus The Gruff Family, now that's just too cute. Oh on second thought maybe Scaring Monsters might be my favorite.

There are also poems in this book, Circular Thinking is a poem and it is kinda weird in a very cool way. Hmo is a poem you can imagine what it's about.

Red is a poem, but you might like the stories better, they all are strange, but so good.

There are stories of sick robots, and a story called Oxygen Bar.

Human Harvest is a story in this book, are you a scaredy cat? Maybe you should leave the lights on, while reading.
