## **Cdsease says**

Cheryl is a master at believable, engaging characters and situations. Like all of her books, the premise is interesting, the characters are ones the reader cares about, and the story is engaging from the first paragraph. I love how easily I fall into one of her stories and find the world around me has slipped away. This one is going on the keeper shelf.

Wow, amazing how one new hair cut and a brand new expensive wardrobe makes a girl suddenly have loads of confidence ?. Her personality transformation happened way to fast, and of course immediately the H is panting at her heels (at least she's used to the panting). Why does the Riley love Lisa??? I'm still not sure after reading the book, maybe because she got pretty. This book just didn't work for me.

This was a good book. I loved how strong Lisa was. She realized Riley's motives early on and stayed one step ahead of him. I like how she didn't give in easily at all when he apologized. The reason I didn't give a 5 star is that although Lisa didn't become enamored with the money she had gotten, I still kind of felt that she didn't begin using it as I would have or towards the usual things such as charities or helping others. She also made a big change with her looks. I agree with her tidying up a bit to feel more confident but her clothes/accessories completely changed to more expensive tastes. This is not horrible but I guess I would have liked her to do differently with the money than she chose to.
