## From Reader Review Torn Series Set: Emma for online ebook

### Deanna says

This is one of the best love triangle series! Emma has 2 hot men, Bass and Carter, vying for her affection. At times, while reading, you're not sure where her heart really lies or who she's going to choose. Pamela Ann is one of my favorite writers because she has a way of making you get so involved and absorbed by the story. There were different times throughout the series where each of them needed to be b\*tch slapped. There were times where I just felt bad for them and times where I was rooting for them. I experienced so many different emotions throughout the series. This is one of my favorite series by Pamela Ann and I highly recommend this box set.

This is the perfect bundle set for someone who has not yet read the Torn series. and it is only .99 on amazon.... Even though there are more books in the series, this one just focuses on Emma and her story. The Emma bundle lets you read the stories back to back without having to read others in between so you can just go where one book left off to the other. It is full of happy moments, sad moments, and Steamy Moments ;) I highly recommend that you read the whole series... I have and I still bought this and went back and read the Emma bundle all over again!

I liked this book.. I loved the love triangle.. But I hate carter no matter what happened with in the book I couldn't get to like him at all. I think it was that he never seemed to move on with his life... At the end of the book I was also unsure of Emma. But bass well I loved him from the beginning. I felt bad at one point for all the characters. Book was very good I will read again. This is a steamy romance that has you wanting more.. A true love triangle

If you are looking for a good steamy read then this is for you.

Only thing that I did not like is that with this book there are some books in between the ones that are in this box set. So I was lost at some points because clearly things had happened in other books that you needed to know for these ones. But in the end you got what was going on eventually.

Holy crap! I had to buy this book box set! I have a lot of these books by themselves but wanted them all in order. So I bought this set and read it for three days straight...any free time I had, I was reading this. To go back and re-read this series still brought goosebumps to me. It ripped my heart out, stomped on it, and then replaced my heart. Holy man, this book series is SO FREAKING GOOD!!! These characters and all their issues and relationships...wow. The love scenes are so smoking hot. I can not express my love for this series. I can not wait for MORE!!! I highly recommend all of Pamela Ann's books. She has this way of sucking you in and leaving you on the edge of your seat and for sure wanting more. I can not wait for the next book in this series!!! I need it like yesterday!! This is a book series I will be re reading again.
